WHY NOT GO THE EXTRA MILE?

That's the approach Robinson Restoration and Service feels is such an important part of what we're about.

RANDOM THOUGHTS.....

We noticed a vehicle transporter loaded with Tesla Cyber trucks racing down the interstate...

....and wondered to ourselves if, given their very aero shape, perhaps the transporter itself would get better than usual fuel mileage?

But, then we remembered that the Cyber trucks weigh anywhere between 6600 and 7500 pounds each, nearly double that of most cars, so we suspect the extra weight will likely eat any aero benefit.

Not long ago, EVs were some of the ugliest vehicles on the road. We never understood why they had to be so homely, well times have changed, now a number of EVs are spectacular looking. Super aero and trend cutting. Finally, they're setting styling trends.

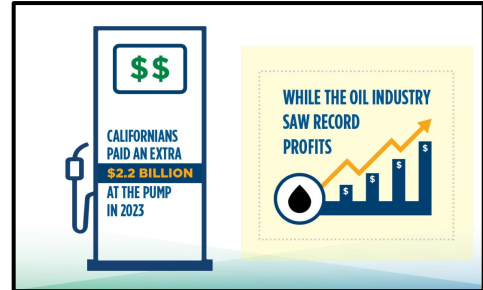

How do cars get ugly, simple, people within the manufacturer, who are neither car people or qualified designers, are given last minute input to a new vehicle design. We've witnessed a number of what started out to be an attractive new car turned to nothing more than the equivalent of automotive suppository.

Examples, Ford's last version of the Capri and a later generation of the Taurus. Many died a simpler death at the hands of management not smart enough to trust the designers.

Motor Vehicle Fuel Prices Include the Following Taxes in Cents per Gallon		
	Gasoline	Diesel
Federal	18.4	24.4
State	59.6	45.4
Plus All Other Applicable State and Local Sale Taxes and Fees (Diesel Fuel Not Available At All Locations)		

How would you like to spend a dollar for something that you only receive 80 cents worth of product for? If that strikes you as fair then welcome to California. **That's right, the newly imposed Gas Tax in California is now .78 cents a gallon!** The head of that state thinks he's going to be the next President of the United States, **FAT CHANCE!** *The state uses this as their private ATM!*

We continue to be amazed that despite today's new vehicle being incredibly safe by design, drivers still find ways to die in them at an increasing rate.

Traffic deaths are up again to 55,000. About 10-years ago that number was headed down to roughly 50,000 but now it grows every year because unskilled, selfish, low talent drivers are over their heads and assuming the road is there just for them. Booze, drugs and texting matched to drivers paying little attention to the task at hand!
